

Title: Chief Mechanical Engineer

Position number: 21

Description: A dynamic startup in the alternative energy field (clean tech) seeks a Chief Mechanical Engineer to take part in the development of an innovative multidisciplinary product. The position includes leading the designing of a complex electro-mechanical system using Solid Works software and implementing advanced analyses.

Requirements:

- Character: We offer an opportunity to candidates who demonstrate excellence and creativity
- Education: B.Sc in Mechanical Engineering (required); advanced degrees (advantageous)
- Experience:
 - At least 15 years as Mechanical Engineer with strong Solid Works experience.
 - Proved experience and know-how in bringing multidisciplinary systems from the very early concept stage to a product stage.
 - Familiarity with high power turning mechanical systems, gearboxes and transmissions.
