

**Title:** Mechanical Design Engineer

**Position number:** 20

**Description:** A dynamic startup in the alternative energy field (clean tech) seeks a Mechanical Design Engineer to take part in the development of an innovative multidisciplinary product. The position includes designing complex mechanical components with Solid Works software and implementing advanced analyses.

**Requirements:**

- Character: We offer an opportunity to candidates who demonstrate excellence and creativity
- Education: B.Sc in Mechanical Engineering (required); advanced degrees (advantageous)
- Experience: 2-3 years as Mechanical Engineer with strong Solid Works design experience in an R&D group.
- Familiarity with turning mechanical systems, gearboxes and transmissions (advantageous)
- Familiarity with mechanical analyses software (advantageous)
